

CAPABILITY STATEMENT

"Changing the DNA of your organization"

CORE COMPETENCIES

Architecture and Planning: Our customized Solution and Enterprise Architecture Plans will provide your company with a path forward technologically and operationally.

Agile Management and Delivery: We will integrate both change management and technological solutions to install best practices and revolutionize business or agency capabilities.

Emerging Technology: Our unique methodology involves applying a foundation of science and math to drive the implementation of emerging technologies, such as artificial intelligence, blockchain, cognitive computing, and robotics.

Information Security: We leverages intelligent systems, processes, and insights to provide constant vigilance and expertise for executive decision-makers and leaders

PAST PERFORMANCE

**Department of Homeland Security
HSCETC-15-A-00007**

**Federal Transit Administration
FTA-TAD20-19-0060**

Department of Health and Human Services

DIFFERENTIATORS

Leading with clear objectives is essential

- Our vision- and values- based framework allows leaders to develop a strategic concept
- Our consultants focus on inclusion at all levels to discover and understand what works in your organization
- We listen and learn; using gathered information, we build realistic objectives that we align with your strategic vision

Emphasizing knowledge transfer is crucial

- Our methodology ensures knowledge sharing, increasing productivity, and empowerment
- We equip people to be more productive while implementing the strategic goals and objectives of your organization

You can do more with less

- Clearly defined objectives, dissemination of legacy knowledge, coupled with advanced technology to augment the user intelligence is our proven formula for doing more with less
- Our methodology across Advanced Analytics and Emerging Technology, Architecture & Planning, Information Security, and Agile Management & Delivery is how we establish a plan for your success
